PORTLAND, TUESDAY, OCT. 26, 1886. THE LABOR QUESTION IN THE SOUTH.

The mind of Mr. Blaine, though exceedingly versatile, has never been very fruitful in ideas of solid and practical character. We have no man in America whose intellectual machinery terms out fireworks as his does; but he has seldom produced anything that has lasted long. He doesn't often go to fundamental facts and prin-ciples; but in discussion of one subject recently he has done it, and the effect upon the mind and politics of the country is likely to be very

important.

What is meant is his deliverance upon the conditions of labor in the South, and upon the system of social and political life that produce and sustain them. At first his argument got little attention; but it has been taken up by the Knights of Labor and proclaimed all aver the country. The gist of it is the statement that labor at the South, kept in ignorance and under control, and defrouded of its political rights, is not only in condition itself little better than the old state of slavery, but dealt with its this way and kept in this condition, is a messae of injustice to fabor in the Northern states.

A special dispatch from Washington to the Northern Report published resterday.

New York Evening Post, published resterday, rew York Frening Fox, punisher varieties of the grees what purports to be the feeling of the Knights of Labor reterring home through Washington from the conclave at kichmond. It is perceived, so the report states, that race prejudice at the South is sustained not so much by opposition to social equality, of which there can be no rational fear, as by the fact that it is a powerful instrument to be used in holding the colored race in industrial subjection and enabling employers to make unjustly large profits out of lahor. Hence it is perceived that "a sec-ond emancipation of the blacks will be neces-sary," and "the laborer of the North will be re-quired to see to it that the laborer of the South gets fair wages." As the employers of the South understand this to be the tendency of things under direction of the Knights of Labar, they are bitterly opposed to that order, and the Southern press, ever since the assembly met at

Richmond, has been vicerously denouncing it Rights first stated this situation as to labor in the South some two months ago in his speeches in Maine. He has more recently been setting it forth in his speeches in Pennsylvania; and the action of the Kuights of Labor at Sichmond, press, is making the subject the talk of the country.

THE "PARTNERSHIP" ARGUMENT.

It is a favorite argument with those who rethat such action on the part of governmen legalizes and upholds an iniquitous trache, and that in thing short of probinition is a "league with hell and a convenant with death," as the old sholdlonists used to say; but the argument is strangely illogical and untenable. For in net, taxation of the liquor traite does not facilitate the traffic but burdens it. It gives the traffic no protection of law that it didn't already possess, but places it under a certain disability penalty or restrictive condition that did not before appertuin to it. Bishop Merrid of the M. B. church, in an article written recently in reply to a criticism upon a discourse by kinaself, in which he had favored taxation to the form of the highest practicable license in cities and towns where there is no reasonable prospect of inppressing the traffic, cleared away in an at-mirable manner the confusion of thought that les behind these otherances against faxation. He said: "The imposition of taxes on the trade may imply that the trade exists, but it gives it no shadow of legal right to exist that it does not have in the absence of the taxes." Again: "The taxes imposed by the state are of the character of penalties rather than of legal authorizations or sanctions, and they bring the state into partor enctions, and they bring the state into partnership with the trade no more than fines for
drunkenness and theft make the state partners
in those offenses. It is time that we cease to
deceive ourselves with sophistries and false issues. While the gatte does not authorize the
traffic, it does permit it, and its responsibility
for permitting it is the same with or without
the taxes." The general government now lays
a tax upon production of oleomargarine; but
does the make the United States a "partner" in
the business of making and selling the article? the business of making and selling the article: Does it give the production of electrargarine any sanction or support of law that it didn't have before? On the contrary, is not the tax in the pature of penalty upon the business, differing in no way whatever from taxes upon the

WHY NOT SHERMAN?

George William Curlis thruks Blaine will be strongly pushed for the republican nomination, and, among other things, says:
Undoubtedly he will be warmly pressed as the

Undoubtedly he will be warmly pressed as the most conspicuous leader, as a great party organized, as the republican of the largest and most devoted following, as the only republican who can command an Irish democratic vote; and this strengest appeal of all in a party convention will be the declaration that it view of his defeat in 1884 upon personal grounds, to set him aside in 1884 upon personal grounds, to set him aside in 1884 upon personal cauchty in the personal charges against like. Yet that is will be ready a stronger than the contract of the personal charges. candidate in 1888, or that the Chycland adminis-tration will have been such as to make the party argument for him more decisive than in 1881, can not be supposed. It will be a hundredfuld easier to be an independent in 1888 than in 1881. Every form of obloquy and blackgraardism and fafsehood ngainst magazings has been exhausted, and it is demonstrated that to vite-injuried with the can it not be vote for national disaster.

We foreignative this deal beat the grandilla-Mr. Curtis evidently thinks that the republi-

can party was beaten in 1884 stropty because Mr. Blaine was the conditate. Many persons will not agree with Curris that one other durif-date would have been more successful from Baine. Had Edmande, Arthur or Conting been non-insted, It is argued that the fartham party discores which i toke our under Christical and did not die out under Arthur would probably have reserted themselves with sufficient violence to have insured defeat in close dates. It is argued that party discords have been considerably discipated by the shock of defeat, and that Mr. Curtis forgets that while it is true that every form of obloquy, the broardsm has been exhausted against the magnanna, it is also true that they have been exhausted against Baine. But whether Curtis is right or wrong con-

ceruing the wisdom of Blaine's renomination, we are surprised he did not urge John Sherman as a possible compromise candidate. For clear intellectual impressiveness of statement, for the rare kind of ability which shapes and puts its stamp on the legislative policy of a great party, Senator Sherman has no superior if he has an equal in either party. Without ornamout, without passion, free from all political tricks, or mere literary phosphoresence, Sherman wine attention by his sound business sense, and strong logic. Sometimes there is a little jet of satire, but usually his speech is keen, cold, col-oriess argament, weighty, because charged with intellect rather than fiaming with Logan-see gladforts fury and animal force. Sherman is strong exactly where Garfield was weak. He has the cold blood, of a severely intellectual man; he is not a man of eloquent promise, but besiness performance; a man of logic, not of iridescent imagination; he is not an orator at ail; he is a superior man of affairs. He is an excellent debater, a fluent, strong, dry speaker, but no orator full of blaze and bounce; he never loses his feet, they are always on the earth; and he will not try to put his head in the stars unless he knows and feels that his feet are on the sarch. He never sentimentalizes, never soars, never solutes on the stump, but he rules in council with his peers of both parties. He stands for the genius of sound commercial statemanship; he has a sharp eye for shallow wresickly financial legislation; he has the courage and integrity to assail, and the has the cold blood of a severely intellectual the courage and integrity to assail, and the acuteness to expose it and the constructive qual-

lation.

If Sherman, from the coldness of his man-ners, he not an an ideal running candidate at the West, where republicans are strong, he would run excellently well where they are weak—in close states like New York and Con-

ity to eliminate or at least abate abuses by legis-

preticut, where the hard money business classes of both parties trust him. The great interests of business would be united for therman, and nothing can be said in depreciation of his private or public character. Sherman is not a man cus chicanery; he has been a successful statemen in the great state of Ohlo for thirty-five years by the sheer force of penetralive power of intellect; he solves everything that is

rouble by his business sagacity.

The people are not disposed nowed my to rote for a legend, for a sentimental conditate. The time has gone by for such a jet to the people would take a man like John shern an, who has proved take a man like John shern an, who has proved this capacity for superion practical statesmanship by some other test than that of kissing his hand to the growd and smiling and shouting from the

Mr. blaine is the bean ideal of a light horse ar. Maine is the bear used of a light more leader in a compaging indomizable, ubiquitous, charging like lightning, furtons in onset, dur-gerous in retreat. But sometimes that sort of buffle in surging charges feams itself away, and it's a fair question whether a heavy actual, iers showy soldler, like Sherman, might make a belier hader.

The discatisfaction with the conduct of I a The discretified, which prevails in Washington territory, is likely to cut some figure in the coming election for delegate to congress. We are told that many democratic settlers with rote for the republican condidate simply as an expension. pression of disgust at the democratic administraion of the land office. It is just possible that the president will pot be deeply affected by any result in Washington territory.

There is a proposition to bridge the Willamet's river at Corvalis. It is estimated that thirty thousand dollars would do the work, the stream at that point being comparatively narrow and not deep. A bridge, it is believed, would bring a large district in the southern part of Linu county and a considerable part of Lana dennity into direct relations with Corvullie and add greatly to the volume of its business.

WOOL AND WOOLEN GOODS.

Talk of a Manufacturer in Troy Times. Our market is governed by the prices which obtain in foreign markets, as our product forms but a small portion of what we use in manufacture. Prices in Europe are from 40 to 50 per cent, above the prices last year, I received a letter from Melbourne, Australia, to-day, dated September 23, and stating that the sales opened there with animation. The market was 25 per cent above last year's prices. The wool clip this senson leaderter. In San Francisco the prices show an advance of 25 to 31 per cent, on the rail clip! In Texns hast year we paid 45 to 50 cents a point for scoured wool; this year it costs us 16 and above. In the Philadelphis may test the shortage is estimated at 10,000,000 pounds below hast year's product, and in New York there is less wool than at any previous time in twenty years. The clip is estimated to be from 35,000,000 to 40,000,000 below the clip of 1884. In Purope the advance in prices on many gradee of wool has been fully 10 per cent, since June. The shut-down at Amsterdam and the agitation at Cohoes checked the demand in our home market somewhat this week, but there has been a good trade all along, and the demand has been steady. In the Philadelphia, market the past week prices rulestrong, and the same may be said of all the markeds. The prices to Europe last February and tip to May affected our home markets, and September 23, and stating that the sales opened

sengma makes the pass were prices interstring, and the same may be said of all the markets. The prices in Europe last February and tip to May affected our home markets, and the importations of foreign goods depressed the trade in this country. But prices began to go up in Europe, and since the advance in prices over these goods that had been imported have level rechipped to Antwerp and London and solit there at a profit above what they would command in our markets.

The importations of wood aggregate 159,000,000 to the mills are consuming 25 per cent. more coursed wool than for any year of the last. Four or five. The last sale at London showed 50,000 bales short of the average sale, and in all probability the November sale will be from 50,000 bales short. At Sidney prices role 50 per cent. above February quotations, and 30 per cent, above hast pear. Yet wool is cheaper to day by 25 cents a pound than the average price for the mast lifty years. We are using 85 per cent. nore wool this year than last, and there is an increase of 15 per cent. in the number of on-sidness. Large odds are reported, and the mills are all busy. Business in general shows a decided improvement. The author's is good, and the impression is gaining that there will be an advance to the prices of '75.

MARK LANE REVIEW.

LONDON Oct. 25.—The Mark Lane Ecopies, in its review of the Rithish grain trade during the past week, says: Restricted scale wheat deliveries has caused values to harden. Several provincial markets report an advance in native wheat of side is. There is an increased inquity in London for the best samples. Sales of English wheat during the past week were 60,150 quarters, it 299 adapaths. 71,318 quarters at 31s 6d during the corresponding week last year. Values of the burleys are advancing. Beans and peas are steady. The rain has desiroyed the Sected nats and Darley crop. Flour is dirner. Corn is rather scarce. Foreign wheats are steadier. There has been gross on passage in the best kinds of Thesat to have a supported the stimulus of the proposed increase in import duty. Cargoes of Californian for French ports are freely taken at 3d@dd advance.

edies ever offered to the public for the SAFE, CEBTAIN, SPEEDY and FERMARENT ours of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it full to cure if the directions are strictly followed and carried out. In a great many cases a single does has been smilledent for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general leath. It is, however, prudent, and in every case more cartain to cure, if its use is continued in smaller doct for a week or two after the disease has been checked, more especially in difficult and long standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require acathert in medicine, after having taken three or four loss of the Tonic, a single dose of KENTS VEGETABLE FAMILY PILLS will be sufficient. Use no other.

BULLTON, Or., Sept. 25, 485.

A sense of duly to those who may be suclighty attleted prompts me to make the following statement: My son Henry, aged 14 years, was almost entirely deaf since quite a child, art having failed to obtain any help for him, I applied to Dr. H. J. Smith, of San Francisco, who pronounced his case one of Gatarrh and improve his hearing at least one-half. He has only be in under the dector's treatment (at home) L'skort fine, and I find his hearing completely restored and Catarrh nearly cured.

MULTON, Or., Sept. 29, 1886.—I take peasure in stating that, after the lapse of one 'par, I find my boy, Henry's, condition bette than stated in my testimonial of one year ago.

MIT. J. A. RICHARDSON, Justice of the Peace.

Mr. J. A. RICHARDSON, Justice of the Peace, Stone, Or., who suffered from tubercular leposit on the lungs, with asthma, resulting from legelected catarrh, states: "When I count remode your treatment I was exactely able to walk, and in five days I was able to walk two miles, and now enjoy fair health, and am confiden that I should have been even better, had I not reglected your treatment as soon as I got better."

To those suffering from Brood, Neuvous or other Chronic Dispases, we would say that it is not our custom to resort to a tedious effusion of trite matter, to excite your ferzs in order to deplete your purse, but will simply say that we have make a thorough study of this class of diseases, and can cure you in the speediest and most scientific manner pos-
